DOUBLE-BOLTED
HANDLES

- » The *PREMIER* digger choice for fencing contractors.
- » Clamshell head shape for digging in sandy, loamy, loosely-packed soils.
- » Handles available in either turned and precision-molded Indiana hardwood (48", 72", 96") or industrial-grade fiberglass (48", 96").

OUR DIGGER STYLES

ATLAS PATTERN

Best suited for homeowner and other occasional applications.

HERCULES PATTERN

Provides maximum strength for the most demanding industrial and commercial jobs.

BUCKEYE PATTERN

Features strong steel pipe handles welded to the square steel shanks and yoke. Super tough square-cut steel blades are ideal for digging in heavy, rocky soils.

LONESTAR PATTERN

Features strong tubular steel handles welded to the thick yokes for digging in the hardest soils.

GIBBS PATTERN

Combines a single blade with hinge action that acts like a bucket to bring loose soil to the surface. Also called a mud bucket.

PERFECTION PATTERN

Has a unique "clamshell" head for digging in sandy, loamy, loosely-packed soils.
